Discovering Your Values

Definition:

Values are the behaviors and attitudes to which you are naturally drawn. They are the “WHO” you really are and the “WHY” of your behavior.

Instructions:

Clarifying your personal values will assist you in making decisions and choices that align with what’s important to you. The more choices we make that align with our values, the more satisfying our work and life becomes.

Please select the ten values that are most meaningful to you. After you’ve selected the top ten, prioritize them in order of importance. Feel free to add if your top values are missing.
